TECHNICAL SPECIFICATIONS

DIMENSIONS

Marybelle is a 28 meters diameter, round tent, with a 42 meters wide footprint and 615 square meters inside floor area.

The 2 King Poles are 12 meters tall and 12 meters apart.

The walls of the big top are 4 meters tall.

CAPACITY

has a capacity of 1230 people standing.

a seated audience capacity of , 750 people max with tiered seating, 475 people max with chairs, 400 people max with round tables.(cabaret restaurant set up)

CUPOLA

Marybelle has an oval cupola that hangs 10 meters from the ground and has a SWL capacity of 1200Kg. For more detailed structural calculations please refer to [this document](#).

SET UP / TAKE DOWN

It takes approximatively 1.5 days to build the big top, depending on the weather conditions. The basic inside setup takes 1.5 days.

The take down takes approximatively 10 hours.

STAGE

The standard stage that comes with the tent is a 10mx10mx900 mm metro deck stage with black masking.

Stage steps with railings are situated on either side of the stage and at the front.

Side entrances are masked by removable wings that separate the audience area from the backstage.

Oak Street
Norwich NR3 3AE
VAT: 252857876
litcircus@gmail.com

The configuration can be tailored to the type of event festival or performance.

BACKSTAGE

Two smaller tents are used as changing rooms in the backstage of the big top. Small props and costumes are stored in the changing rooms, while bigger props are stored in designated areas on either side of the backstage.

ACCESS

The big top has 6 laced entrances, 4 of which need to be clear at all time for emergency reason. Three of these exits grant direct access to the backstage but only the one can be used to bring in and out big equipment.

LIGHTING and SOUND

The lighting and sound desks are normally situated at the centre front of the big top, behind the audience.

Here you will find an example of a light and sound set up that travels with our tent:
